

# Transforming Wealth Management with Open Banking

## Introduction

### About this guide

We've featured 4 use-cases and prototypes in this guide powered by our technology that can transform your wealth management business.

Prototype	Page
Account verification	2
Funding an account	3
Notification to payment	4
Financial segmentation	5–6

## Account verification

#### Open the prototype

The Account Verification Journey allows you to verify new users quickly and accurately through bank-grade security checks without having to process streams of raw data.

## Step 1

INVESTMENT ACCOUNT £15,856.00

Total balance (£)

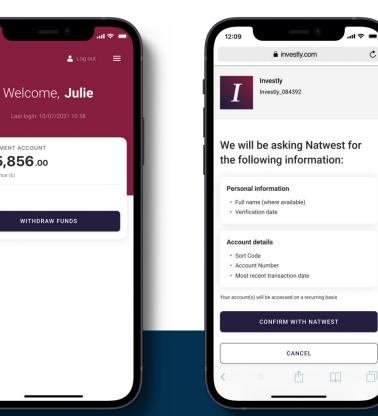

Your customer starts their verification journey through your app.

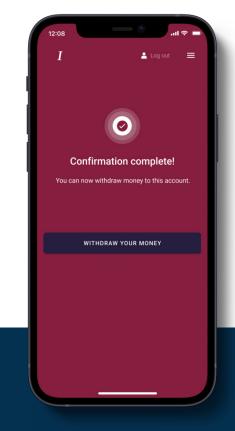

## Step 2

The customer is redirected to the Bud platform to connect their bank account(s)

#### Step 3

Once connected, the account verification process is complete.

# Funding an account

#### Open the prototype

With Open Banking you can make it quick and easy for your customers to fund their account. It's fast, safe and extremely cost-effective vs alternatives like card payments. Step 1

Your customer can set up a regular or one-off payment to fund their account

How much do you want

There is no minimum deposit, your money is always welcome here

to top up each month?

£100

🔒 Log out

=

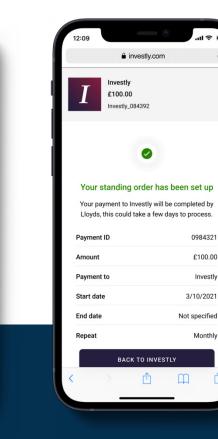

#### Step 2

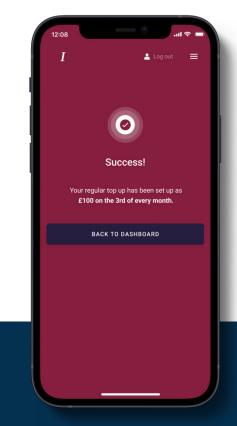

Once they've selected a bank account to transfer funds from they can review the payment.

C

#### Step 3

The scheduled top-up is set up or the money transfer is set up instantly.

# Notification to payment

#### Open the prototype

#### Step 1

Prompt your customers with a notification that takes them straight to the app to start the top-up journey

## Step 2

To fund the account your customer chooses their bank. Bud covers 96.5% of current accounts in the UK

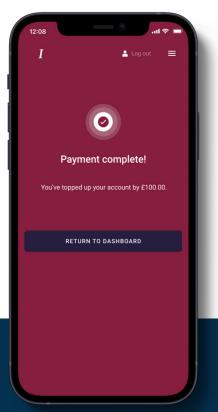

#### Step 3

After setting a top-up amount and approving the payment through deeplinking with their bank,

With Open Banking you gain even more insight into your customers finances. Send them a notification when they receive a bonus payment to encourage them to invest more.
